# ARABIA

THE CENTRAL, BUT MISSING  
LINK IN WORLD PREHISTORY

WED 12TH  
MARCH 2014  
AT 5.30 PM

THE MBI AL JABER BUILDING,  
CORPUS CHRISTI COLLEGE,  
MERTON STREET, OXFORD

Satellite images show Arabia was well-watered many times in the past. This talk will examine evidence (stone tools, rock art) from ancient rivers and lakes in Arabia. New archaeological discoveries demonstrate that Arabia was a central cross-road in the remote past and a key geographic link between early human cultures in Africa and Asia

*Presenter: Prof. Michael Petraglia of Oxford University*

This event is open and free to all-comers but could you please let the organiser know if you are coming [info@mbifoundation.com](mailto:info@mbifoundation.com)
